AAKASH JANI

Senior Game Developer (Unity | Unreal Engine)

Phone: +91 70694 22342 | Email: akashkjani@gmail.com | Open to Relocation

PROFESSIONAL SUMMARY

Senior Unity Game Developer and Team Lead with 7 years of experience designing, building, and shipping 30+ multiplayer, AR/VR, and mobile games for Android, iOS, and WebGL. Strong in C#, gameplay systems, game architecture, and real-time multiplayer networking (Photon PUN/Fusion, Mirror, Netcode for GameObjects, Socket.io). Experienced in REST API and backend integration, Firebase, monetization (AdMob, In-App Purchases), live operations, and performance optimization, with 99.5% crash-free sessions and 40% better network stability. Working knowledge of Unreal Engine 5 (Lumen lighting, Lightmass, Blueprints). Skilled in Agile/Scrum, code reviews, mentoring, and collaboration with international stakeholders.

TECHNICAL SKILLS

Game Engines: Unity (7 years, primary), Unreal Engine 5 (working knowledge)

Unity: C#, gameplay systems, game architecture, ScriptableObjects, Addressables, AssetBundles, Shader Graph, DOTS, UI Toolkit/UGUI, AR/VR, Android and iOS builds, WebGL

Unreal Engine 5 (working knowledge): Blueprints visual scripting, C++ gameplay classes (basic), Material Editor, Niagara (basic), UMG UI, Lumen and Lightmass lighting, Unreal Insights and stat profiling

Programming: C#, C++ (basic), OOP, SOLID, design patterns, data structures, algorithms

Multiplayer and Networking: Photon (PUN, Fusion), Mirror, Unity Netcode for GameObjects (NGO), Socket.io, client-server architecture, real-time synchronization

Backend and APIs: RESTful APIs, backend service integration, JSON, Firebase, Azure (basics), SQL optimization concepts

Monetization and Analytics: AdMob, In-App Purchases (IAP), Firebase Analytics, live operations

Performance and Optimization: Memory profiling, draw call reduction, garbage collection optimization, Unity Profiler, crash-free session optimization

Tools and Workflow: Git, Git workflows, CI-ready build pipelines, Jira, technical documentation

Leadership and Process: Agile/Scrum, sprint planning, code reviews, mentoring, cross-functional team leadership

KEY ACHIEVEMENTS

- Led architecture and delivery of 30+ commercial game titles across mobile, WebGL, and AR/VR.
- Improved multiplayer network stability by 40% using Photon, Mirror, and Socket.io.
- Achieved 99.5% crash-free sessions through profiling and memory optimization.
- Mentored 6+ developers and established Git workflows and code quality standards.
- Reduced release cycles by 35% through CI-ready Git processes and build optimization.
- Collaborated with international teams and stakeholders across India, Hong Kong, and global markets.

PROFESSIONAL EXPERIENCE

Senior Game Developer / Team Lead

Appsotix IT Hub, Pune | 2025 - Present

- Lead end-to-end development of game products from concept to production release.
- Manage cross-functional teams of developers, artists, and QA.
- Conduct code reviews and enforce maintainable, scalable architecture.
- Drive sprint planning, roadmap execution, and process improvements.
- Collaborate with stakeholders and international teams on technical alignment.

Senior Game Developer

Playano Education Pvt. Ltd., Hong Kong | 2023 - 2025

- Led development of an educational rhythm game used by a global user base.
- Integrated analytics, monetization systems, and backend services.
- Improved application performance and optimized game logic in C#.
- Mentored junior developers and introduced structured Git workflows.

Unity Game Developer

Saturncube Technologies, Ahmedabad | 2019 - 2023

- Delivered 20+ cross-platform games from design through live operations.
- Built real-time multiplayer systems with Photon, Mirror, and Socket.io.
- Implemented backend integrations and REST API communication.
- Eliminated memory leaks, reaching 99.5% crash-free performance.
- Worked closely with distributed teams and clients.

UNREAL ENGINE EXPERIENCE

- Built gameplay logic and prototypes with Blueprints, and applied basic C++ for Unreal gameplay classes.
- Lit scenes in Unreal Engine 5 with Lumen and Lightmass, adjusting light types and post-process volumes.
- Created and tuned materials in the Material Editor and effects with Niagara (basic).
- Built UI with UMG and profiled performance using Unreal Insights and stat commands.
- Applied Unity performance knowledge (draw calls, profiling, memory) when optimizing Unreal scenes.

EDUCATION

Bachelor of Engineering, Computer Engineering

Gujarat Technological University (GTU) | 2015 - 2019 | CGPA: 8

Higher Secondary Education (12th), Science | 2015 | 70%

Secondary Education (10th) | 2013 | 68%
